

FINANCIAL DISTRICT STUDY

FINANCIAL DISTRICT STUDY AREA PLAN

I. Introduction

1. Executive Summary

II. Framework for the Plan

1. Historic Overview: Past and Present
2. General Context
3. The District Plan: Overview
4. The Boston Economy; Role of the District in the Economy

III. Issues

1. Urban Design and Development
 - Urban Design Standards/Guidelines/Objectives
 - Development Policies/Strategies and Controls
2. Housing and Neighborhood Opportunities
3. Transportation and Access
4. Open Space/Public Realm
5. Historic Preservation
6. Land Use
7. Economy

IV. Achieving the Plan

1. Zoning
 - Height Standards, Land Use, Floor Area Ratio, Setbacks, Massing
2. Implementation
 - Community Review Process
 - Approval Process

V. The District Plans

1. Specific Detailed Plans for Subareas within the District

VI. Appendix

1. Historic Building Inventory
2. Current Development Proposals

FINANCIAL DISTRICT STUDY AREA PLAN

I. INTRODUCTION

1. Executive Summary

II. FRAMEWORK FOR THE PLAN

1. Historic Overview: Past and Present

2. General Context

- overview of the district in context of the city

3. District Plan Overview

- planning premise: overbuilding in the downtown in the 1960s and 1970s has created the district's dense urban fabric with some resulting negative environmental impacts, e.g. wind and shadow, and negative effects on the area's pedestrian activity areas
- the preparation of a new plan and new zoning regulations provides the opportunity to limit/curtail new growth and to address the issues of improving the quality of the district's public realm

4. The Boston Economy

- role of the district in the city's present and future economy

III. ISSUES

1. Urban Design, Planning and Development

Urban design goals and objectives:

- utilize Post Office Square Park as a principal orientation device within the district
- identify primary connector streets that extend through the district to the waterfront, linking the district with the Harborwalk waterfront promenade
- provide new through streets across artery to make the district's street system more legible (e.g. extend radiating streets such as India, Broad, Batterymarch, Oliver and Pearl Streets to waterfront)

- maintain view corridors and vistas to the waterfront to serve as orientation devices for pedestrians from within the district
- study historic street patterns in order to generate a street pattern which provides a central artery interface, and reconnect the district fabric now bisected by the artery
- preserve and extend network of public spaces, including streets, alleys, parks, arcades, lobbies and passageways
- encourage public through-block connections and public arcades in new development and renovation projects, to extend the district's pedestrian network and to create a more comfortable pedestrian environment in the area
- provide increased and more continuous ground level retail activity to enhance the pedestrian environment
- preserve and rehabilitate existing historic buildings which contribute to the architectural character and human scale of the district
- conduct environmental studies to document existing wind and shadow conditions; incorporate wind and shadow standards in the new zoning regulations to reduce and/or mitigate any observable negative environmental conditions
- provide roof-top addition guidelines specific to the district's predominant building type
- provide new development guidelines which respond to existing environmental constraints
- provide recommendations for infrastructure and streetscape improvements.

2. Housing and Neighborhood Opportunities

- assess housing in the district and recommend projected housing requirements, if appropriate

3. Transportation and Access

- study existing parking conditions and project future parking needs
- improve vehicular access for planned garage locations
- improve transit access and regulation of traffic flow
- study potential off-street loading capabilities
- provide better vehicular and pedestrian access through district to the waterfront
- provide safer and more comfortable intersections at Dewey Square for both vehicular and pedestrian traffic en route to/from South Station

4. Open Space/Public Realm

- enhance the district's network of public spaces
- provide streetscape improvements to enhance the pedestrian environment
- extend pedestrian network to include through-block connections and incorporate the area's historic street and alley patterns

5. Historic Preservation

- preserve the district's existing historic buildings which contribute to the architectural character of the district
- provide design guidelines for roof-top additions

6. Land Use

- study existing land use patterns and recommend projected land use goals

7. Economy

- define the role of the district in the future downtown economy
- define public benefits to be derived from new development in the district: day care, jobs linkage, housing linkage, etc.

IV. ACHIEVING THE PLAN

1. Zoning
 - . define height standards, land use, floor area ratio, setbacks, massing, for the district
2. Implementation
 - . community review process
 - . approval process

V. THE DISTRICT PLANS

- . prepare plans and recommendations for specific areas within the district

VI. APPENDICES

1. Historic Building Inventory
2. Current Development Proposals
