

Notice of Remote MEPA Meeting

SUBJECT: City of Boston Resilient Fort Point Channel Infrastructure Project

EEA NO.: 16514

An Environmental Notification Form (ENF) has been submitted on behalf of the City of Boston and Boston Planning & Development Agency (BPDA) for the Resilient Fort Point Channel Infrastructure Project. The project, part of Climate Ready Boston, will involve construction of a 2,090 linear foot mixed berm and floodwall mitigation structure along a portion of the Fort Point Channel's southeast shoreline, along with the installation of three interim flood protection barriers.

The purpose of the project is to reduce flood damage and provide protection to nearby populations, infrastructure, utilities, and structures in Fort Point, South Boston, and adjacent neighborhoods.

The project requires the submission of an ENF pursuant to 301 CMR 11.03(3)(b)(1)(a) and 11.03(3)(b)(1)(f) because it requires a State Agency Action and involves the alteration of Coastal Bank and greater than ½ or more acres of any other wetlands.

The project requires a Chapter 91 (c. 91) License from the Massachusetts Department of Environmental Protection (MassDEP). The project requires an Order of Conditions from the Boston Conservation Commission, or in the case of an appeal, a Superseding Order of Conditions from MassDEP. This project is receiving a Pre-Disaster Mitigation grant for \$10,000,000 from the Massachusetts Emergency Management Agency (MEMA) via the Federal Emergency Management Agency (FEMA).

The remote meeting is scheduled as follows:

DATE: February 1, 2022

TIME: 1:00 PM
