Please accept this email as Boston Parks and Recreation Department's comments for the proposed building at 256 Dorchester Street, and share it with the public, the IAG and the proponent.

This development will include 32 residential units as well as commercial space. It will require relief from zoning for height, massing, setbacks and onsite usable open space. The building will include eight roof decks. The residents of this building will therefore seek the City's public open spaces in which to recreate. There is already a high demand for limited park space to serve this rapidly growing neighborhood.

BPRD respectfully requests that the impacts to open space be mitigated through a contribution in support of parks in South Boston. A community contribution commensurate to the scale of the development would ensure the creation of much needed greenspace, which will be an amenity to the households at 256 Dorchester Street and neighborhood residents.

Further, if the building intends to allow animals, a pet recreation space should be provided onsite to accommodate needs and relieve impacts to the City's parks.

Thank you for your consideration.

Good Afternoon,

The Proposed Project consists of the demolition of the existing single story commercial building occupying the site and the construction of a five (5) story mixed-use building that will include approximately 7,395 square feet of ground floor retail/commercial space, thirty two (32) residential rental units, and approximately twenty three (23) off-street vehicle parking spaces.

Raul-

I am writing to give my support for the Proposed Project. I think it is the right size, density and has the correct number of parking spaces for a TOD like this. I love the roof decks for the top floor as well. My only comment is that I would strongly encourage the Proponent to provide an enhanced public realm including improved bus stops along 8th and Dot St as well as ensuring the correct number of public bike parking spaces are provided along frontage. Look forward to the continued process.

Dear Raul,

I am writing to you to voice my support for the development project that was presented at the Article 80 meeting which you conducted last night for the proposed project at [256 Dorchester Street, South Boston, MA. 02127](#)

This project as proposed will be a valuable community benefit in not only providing additional housing at a site that does not have any housing but will also allow a long time community based business to remain in the community.

The addition of the 32 units along with the off street parking will fit in nicely with the re-development portion of Phase 3 of the Old Colony Development. The widen sidewalk along with the proposed street scape will add a nice sight line to this section of Dorchester Street.

The owner of the property along with his staff have been most supportive to the South Boston Community. Never turning away any request for help for those in need. It is now time for all of us in South Boston to support this project.

As evident by the outpouring of support at last night meeting I trust that you will advise your supervisors to "fast track" this project so that the developer may move forward to re-locate his market while construction take place.

Please feel free to reach out to me if I can be of any assistance to you,

Sincerely,

Dennis M. Conway

Hello Mr. Duverge,

I am unable to make tonight's meeting regarding 256 Boston Street in South Boston but would like to show my support for the project. It would be a great addition to the other upgrades happening in the neighborhood and the benefits seem congruent with other projects in the area. The neighborhood needs a market that can supply the demand of a rising population that's spending money where they live. Bells already has a solid reputation and long standing name, it would be a huge win if they were able to expand and meet the needs of even more people. Thank you and happy Thanksgiving.

Cheers,

Stephen Mann
