East Boston

East Boston is a tight-knit neighborhood made up of both long-time residents and new arrivals. Home to diverse, immigrant communities since the Cunard Line terminal opened there in 1840, East Boston has been, by turns, largely Irish, Jewish, and then Italian for most of the 20th century. In recent years, East Boston has welcomed a growing Latino population. Originally a group of islands, East Boston was joined together by filled land and developed in the 1830s as a residential and resort community. Twenty years later it became a center of shipbuilding, launching Clipperships on trading voyages around the world.

Today, much of the commercial activity in East Boston is centered on Logan International Airport, which opened as Boston Airport in 1923 and began to expand rapidly after World War II. For many years, East Boston was linked to the rest of the city only by ferry service. Construction of the country's first underwater subway tunnel (in 1904), and the opening of the Sumner (1934), Callahan (1961) and the Ted Williams (1995) Tunnels have increasingly connected the neighborhood to the rest of Boston over the last hundred years.

ii. List Of P (Population) And H (Housing) Tables In The Summary File 3 (SF3).

i. NOTES TO THE READER

1. Two of the important US Census 2000 data files used in the compilation of demographic reports are Summary File 1 (SF1) and Summary File 3 (SF3). SF1 uses the Short Form questionnaire while SF3 uses the Long Form Questionnaire. Moreover, SF1 is a 100% count giving data to the smallest level of census geography, the Block. SF3 is a sample count of 16% of the population giving data to the Block Group level which is a cluster of Blocks. In the aggregation of SF3 data for this report, the Planning Districts straddle Block Groups boundaries. These will have slightly different numbers from those aggregated using the SF1 data. Total population of the planning district, for example, the South End based on SF1 may show slightly different numbers if compiled using SF3. (See Appendix for a brief description of census geography. Short Form and Long Form Questionnaires can be found on the US Census Bureau website, American FactFinder: <http://factfinder.census.gov>)

2. Because of changes in the boundaries of Block Groups between 1990 and 2000, precise comparison of 1990 and 2000 data on Planning Districts/Neighborhoods is not possible.

3. Racial categories of population are limited to six. Hispanic population may be included in any racial group. White alone population includes Hispanic whites. The category of persons belonging to One or More Races is termed Multiracial.

4. Numbers within parentheses at the end of the table title represent table numbers assigned by the US Census. These table numbers are useful in accessing data using American FactFinder for different types of geography such as a Census Tract or a city. A list of P (Population) and H (Housing) Tables, which provide data at the Block Group level, is given in the Appendix. This report aggregates only Block Group level data as done for all the Planning Districts. However, data available only for Census Tracts can be aggregated to Boston city to generate a more extensive set of characteristics. Complete census tract data can be found on the US Census website.

5. While variables are retained in their original form, some of their class intervals have been aggregated into fewer intervals to make the tables simpler.

6. Some tables include additional derived data such as medians or per capita incomes.

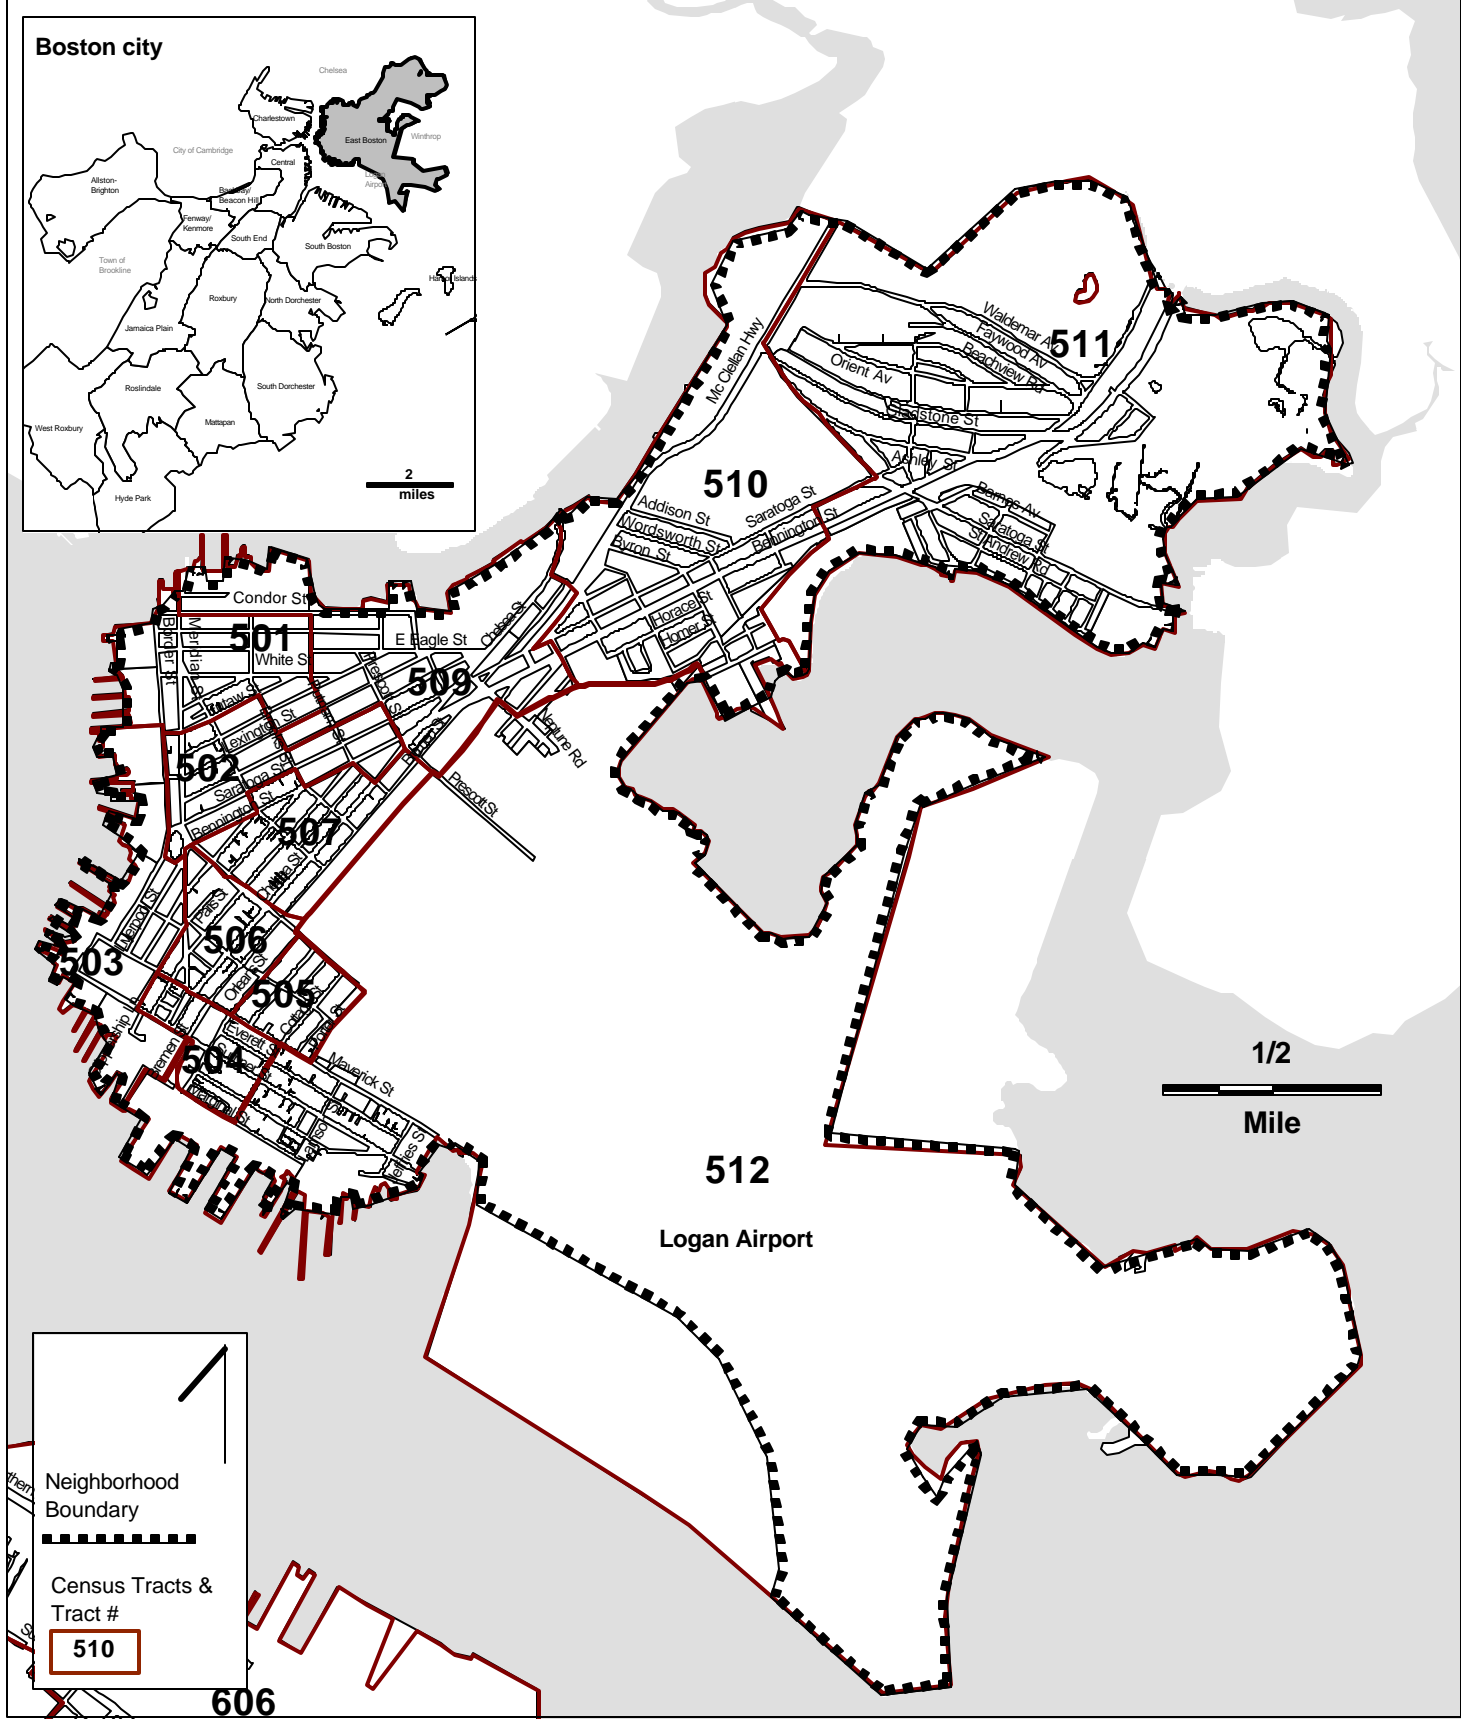

7. For definition of terms, please see "Census 2000 Glossary", which is published as a separate document (Report # 568) by the BRA .

8. Income-related data such as household income, poverty rates, etc. refer to year 1999.
