The BPDA Research Division strives to understand the current environment of the city to produce quality research and targeted information that will inform and benefit the residents and businesses of Boston. The Division conducts research on Boston’s economy, population, and commercial markets for all departments of the BPDA, the City of Boston, and related organizations. The information provided in this report is the best available at the time of its publication.

# Introduction

*Boston in Context - Neighborhoods* compares the United States, Massachusetts, Boston, and Boston's neighborhoods across several social, economic, and housing characteristics. These data are from the 2014-2018 American Community Survey (ACS).

Neighborhood boundaries are based on a combination of census tracts, zip codes and zoning districts. For Decennial Census data analyses, neighborhoods can be defined by Census Blocks, the smallest available geography. However, this report uses ACS data that are only available at the Block Group and Census Tract level. When Census Tracts are split by Neighborhood boundaries, the Census Tract is assigned to the Neighborhood where the higher concentration of residents lived at the Block level in the 2010 Decennial Census.

Because they cannot be separately identified at the Census Tract level, the neighborhoods of Chinatown, Leather District, and Downtown are combined into "Downtown" for all ACS analyses. The same is done with the South End and Bay Village. The consolidated neighborhood is called "South End" for all ACS analyses.

Lastly, Census Tract 9815.02 is partially in East Boston and partially in Revere. The Census Bureau counts the entire population of the Tract as residing in Revere, and we follow that guidance in omitting them from the Neighborhood-level analyses.
