Census 2000 Redistricting Data (Public Law 94-171) Summary File

Introduction

This report presents the latest census data for Boston's voting age population 18 years and above for the 22 wards 254 precincts based upon the initial release in March of 2001 of PL 94-171 data for the year 2000. The purpose of this report is to supplement BRA Reports #542¹, #544² and 552³ that provide data useful for redistricting purposes, which is the primary purpose of the March 2001 release of PL 94-171 census figures. Total voting age population data and counts by race and ethnic categories are presented for each ward and precinct and for the entire city.

Boston's Wards and Precincts

Boston's system of ward and precincts dates back to the time that the city was first incorporated in 1822. At one time, the city was divided into 26 wards. But since 1925, Boston has been divided into the 22 wards, which are in effect today. Over the years, the number of precincts in the city has also decreased, from a high of 271 to the current 254 (including the precinct made up of one of the harbor islands).

The term "precinct" was used in England to describe an area that could be patrolled by a single police officer. In Boston, at one time, voting and police precincts were one and the same. Today, however, precincts are based solely on population and should not exceed 4,000 residents. The map which follows shows the precinct lines as they have been re-defined into Voter Tabulation Districts (VTD's), areas of equal population based on federal census statistics, first used in the 1996 elections.

Racial and Ethnic Categories Used in the 2000 Census

Over the years, the U.S. Census Bureau has changed the description of and increased the number of its *racial* categories to accommodate the way respondents identify themselves. By 2000, the number of racial categories had increased to 63, as the Census Bureau, for the first time, permitted respondents to classify themselves in more than one category. The Bureau then collapsed the 63

categories into eight major categories. (In 1990, there were only six categories.) Meanwhile, the Census Bureau has continued to divide persons in all racial groups into one of two *ethnic* categories: either *Hispanic or Latino* or *Not Hispanic or Latino*, for a total of 126 racial-ethnic categories.

Although this report does not compare the 2000 Census results with those of past years, to preserve the ability to compare the present results with those of the past and to track changes in Boston's racial and ethnic diversity, it has been necessary to reduce the Census Bureau's eight categories to seven categories as shown in the following chart.

Census Bureau Categories	BRA Categories
1. White (Non-Hispanic)	1. White*
2. Black or African American (Non-Hispanic)	2. Black/African American*
3. Hispanic or Latino (across all racial categories including Multi-Racial)	3. Hispanic
4. Asian (Non-Hispanic)	4. Asian/Pacific Islander*
5. Native Hawaiian & Other Pacific Islander (Non-Hispanic)	5. Native American*
6. American Indian or Alaskan Native (Non-Hispanic)	6. Other Single Race*
7. Other Races (Non-Hispanic)	7. Multi-Racial*
8. Multi-Racial (Bi-Racial and Multi-Racial, Non-Hispanic)	

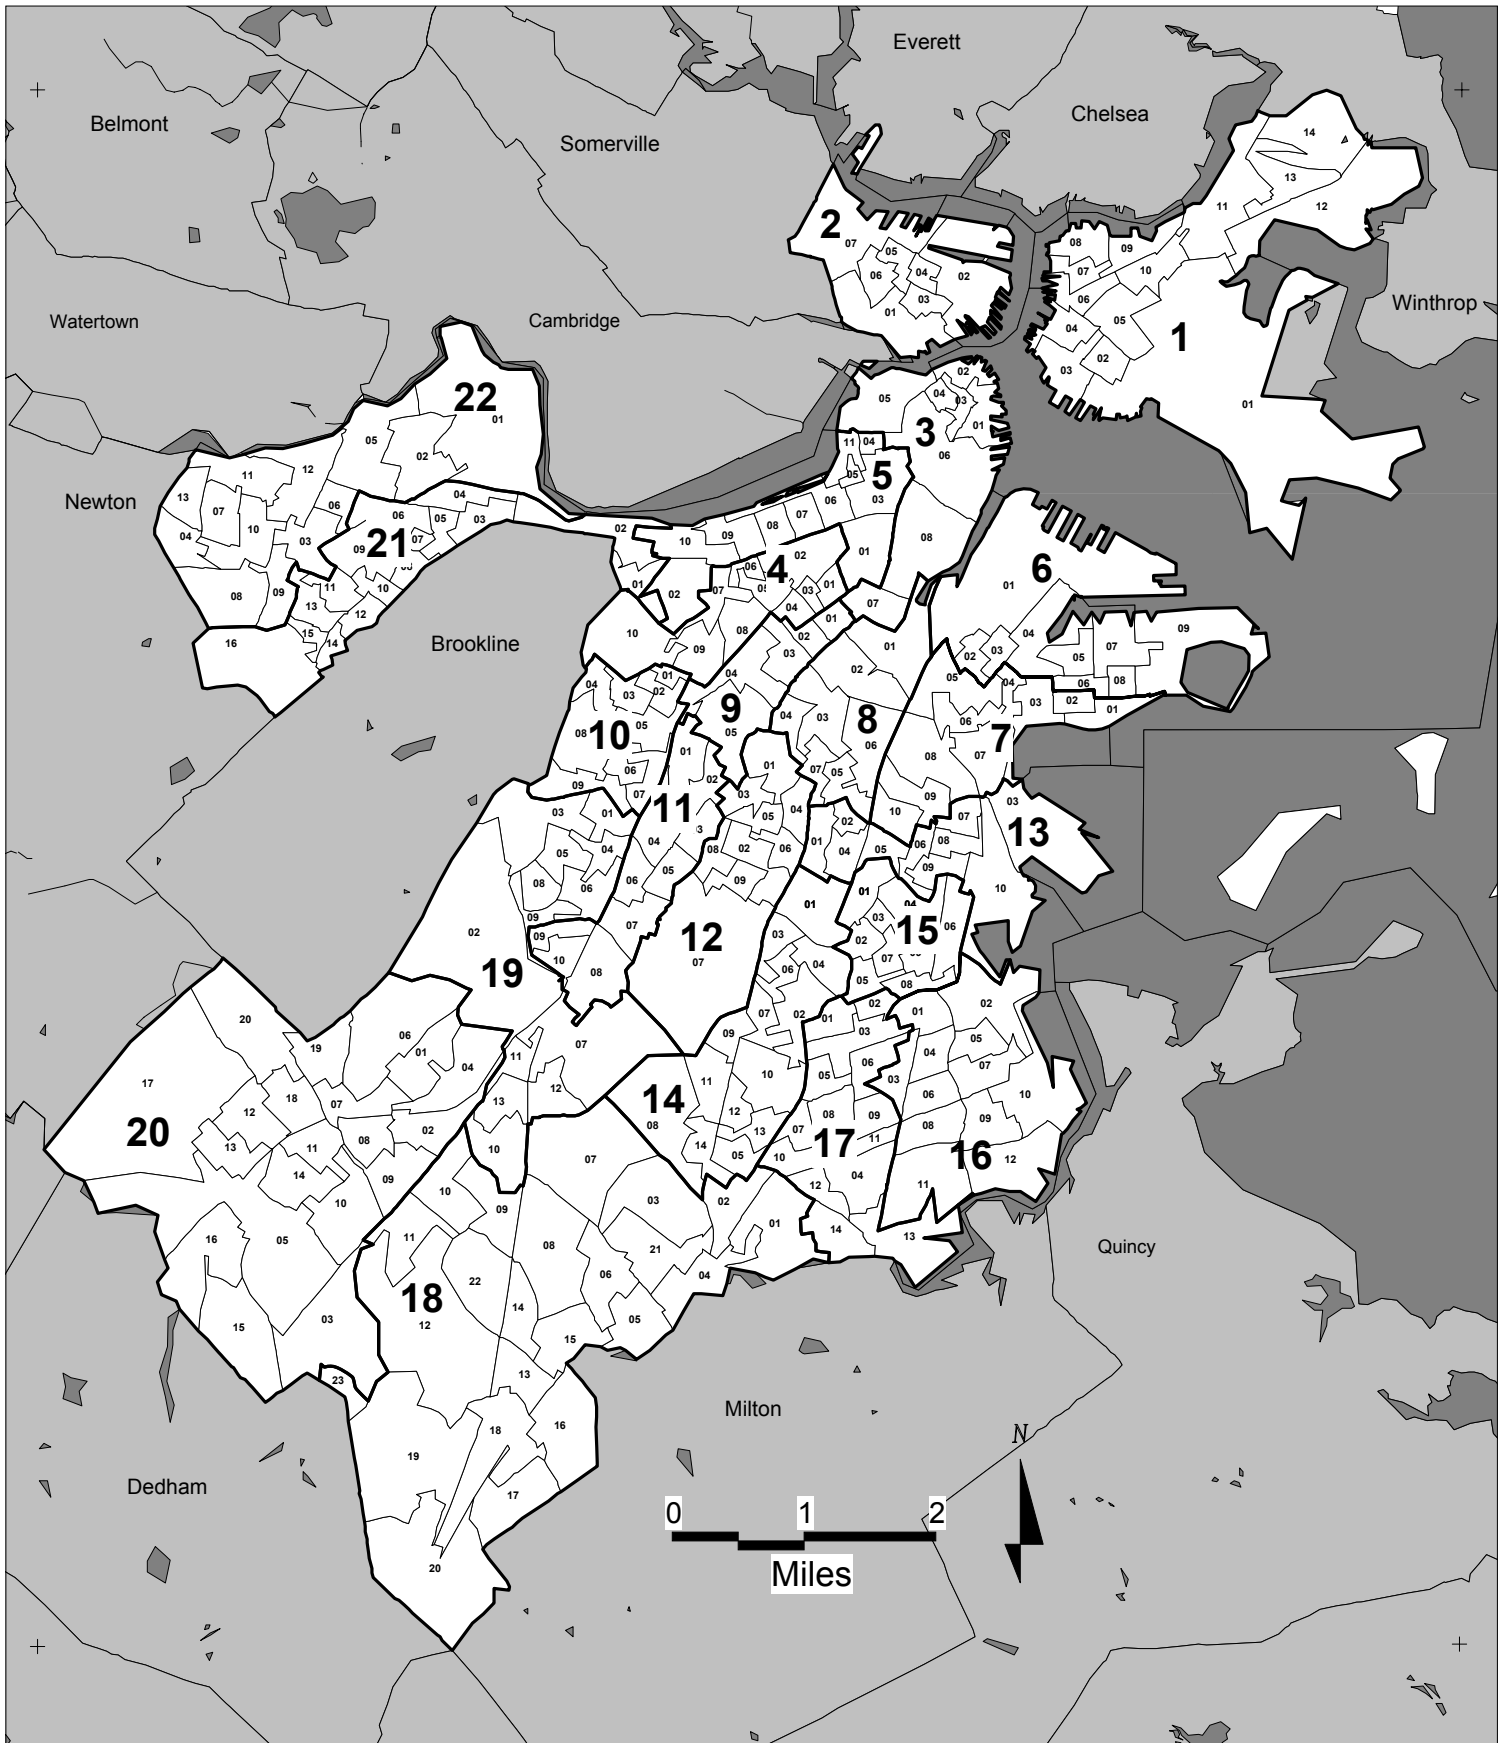

* Non-Hispanic

The reader interested in changes in Boston's population, which occurred between 1980 and 2000 in the city as a whole, as well as its neighborhoods should review BRA Reports #541⁴, #543⁵ and #547⁶. More detailed analysis of race and ethnicity using all of the Census Bureau's new racial and ethnic definitions will be available at a later date as data are released.
