## Jamaica Plain

Originally part of Roxbury, the name of this neighborhood's name is thought to be derived from that of an Indian sachem (Kutchemakin) or from the description of the way 17th century residents liked to drink their Jamaican rum ("neat" or "plain"). The site of many summer homes, particularly around Jamaica Pond, the water supply for Boston and Roxbury beginning around 1800, Jamaica Plain seceded with Roslindale and West Roxbury to form the independent town of West Roxbury in 1851, which was annexed to Boston in 1874.

The Stony Brook area was for a long time an industrial area, and the site of many breweries, founded by members of the large German population, which settled on and around the Mission Hill area. The coming of the streetcar lines in the 1880s prompted increased residential development - including the first subsidized single-family housing developments in the United States (on Round Hill Street, in 1890), and a residential development for Boston Elevated Railway workers (Woodbourne, near Forest Hills), beginning in 1912.

Centre Street runs the length of Jamaica Plain and today offers a diverse mix of retail stores and restaurants. The area is also well served when it comes to open space, the site of Olmsted Park, Jamaica Pond, the Arnold Arboretum, Franklin Park, and even Forest Hills Cemetery, one of the first "garden" cemeteries in the United States.

i. Census Geography of Boston

ii. List of P (Population) and H (Housing) Tables in the Summary File 3 (SF3).

## I. NOTES TO THE READER

---

1. Two of the important US Census 2000 data files used in the compilation of demographic reports are Summary File 1 (SF1) and Summary File 3 (SF3). SF1 uses the Short Form questionnaire while SF3 uses the Long Form Questionnaire. Moreover, SF1 is a 100% count giving data to the smallest level of census geography, the Block. SF3 is a sample count of 16% of the population giving data to the Block Group level which is a cluster of Blocks. In the aggregation of SF3 data for this report, the Planning Districts straddle Block Groups boundaries. These will have slightly different numbers from those aggregated using the SF1 data. Total population of the planning district, for example, the South End based on SF1 may show slightly different numbers if compiled using SF3. (See Appendix for a brief description of census geography. Short Form and Long Form Questionnaires can be found on the US Census Bureau website, American FactFinder: <http://factfinder.census.gov>)

2. Because of changes in the boundaries of Block Groups between 1990 and 2000, precise comparison of 1990 and 2000 data on Planning Districts/Neighborhoods is not possible.

3. Racial categories of population are limited to six. Hispanic population may be included in any racial group. White alone population includes Hispanic whites. The category of persons belonging to One or More Races is termed Multiracial.

4. Numbers within parentheses at the end of the table title represent table numbers assigned by the US Census. These table numbers are useful in accessing data using American FactFinder for different types of geography such as a Census Tract or a city. A list of P (Population) and H (Housing) Tables, which provide data at the Block Group level, is given in the Appendix. **This report aggregates only Block Group level data as done for all the Planning Districts. However, data available only for Census Tracts can be aggregated to Boston city to generate a more extensive set of characteristics. Complete census tract data can be found on the US Census website.**

5. While variables are retained in their original form, some of their class intervals have been aggregated into fewer intervals to make the tables simpler.

6. Some tables include additional derived data such as medians or per capita incomes.

7. For definition of terms, please see "Census 2000 Glossary", which is published as a separate document (Report # 568) by the BRA .

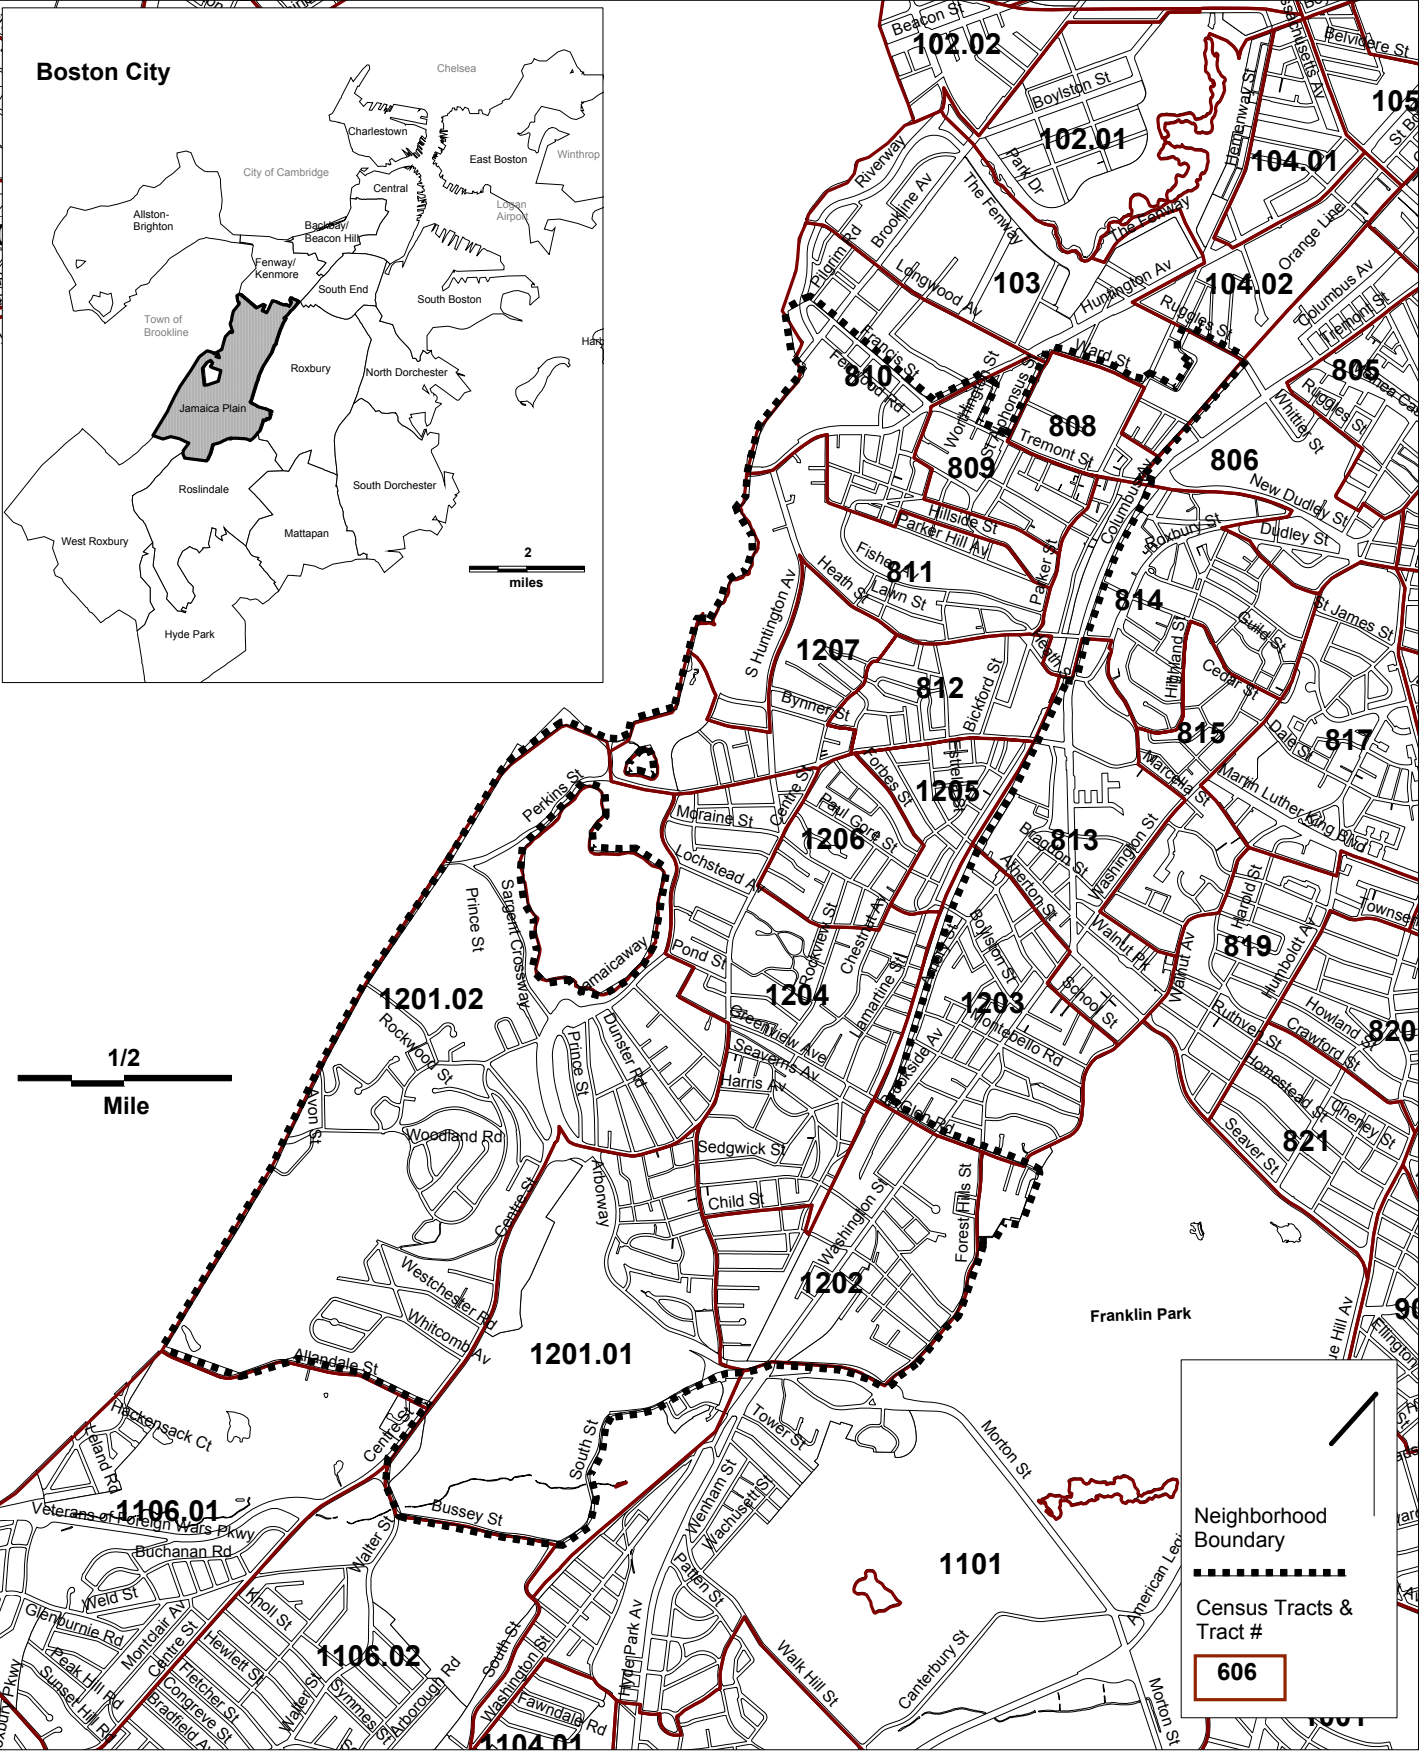

8. Income-related data such as household income, poverty rates, etc. refer to year 1999.
