South End

The South End is built on tidal flats filled in during the early and mid 1800s. Although designed to attract the wealthy merchant class, the South End lost the competition for that population to the Back Bay in the late 1880s and became first an area of lodging houses, then over most of the 20th century home to a diverse population of immigrants and long-time residents, and in recent years to more professional households.

Beginning in the early 1900s, the South End also began to attract a number of the city's churches, hospitals, and other institutions, including Boston City Hospital and the Boston University Medical Center, which merged to form the Boston Medical Center in 1996.

In 1947, the "New York Streets area" in the lower the South End became the city's first "urban renewal area and was transformed into a predominantly industrial area. The remainder of the South End was later protected by landmark designation, and is today the largest Victorian row-house neighborhood in the United States. In the 1980s, extensive public and private investment led to many of those buildings being returned to single family units or condominiums.

Commercial activity in the South End today is concentrated along Columbus Avenue, Tremont and Washington streets, and includes many fine restaurants. Open space is provided by the Southwest Corridor Park and neighborhood parks and playgrounds.

i. Census Geography of Boston

ii. List of P (Population) and H (Housing) Tables in the Summary File 3 (SF3).

I. NOTES TO THE READER

1. Two of the important US Census 2000 data files used in the compilation of demographic reports are Summary File 1 (SF1) and Summary File 3 (SF3). SF1 uses the Short Form questionnaire while SF3 uses the Long Form Questionnaire. Moreover, SF1 is a 100% count giving data to the smallest level of census geography, the Block. SF3 is a sample count of 16% of the population giving data to the Block Group level which is a cluster of Blocks. In the aggregation of SF3 data for this report, the Planning Districts straddle Block Groups boundaries. These will have slightly different numbers from those aggregated using the SF1 data. Total population of the planning district, for example, the South End based on SF1 may show slightly different numbers if compiled using SF3. (See Appendix for a brief description of census geography. Short Form and Long Form Questionnaires can be found on the US Census Bureau website, American FactFinder: <http://factfinder.census.gov>)

2. Because of changes in the boundaries of Block Groups between 1990 and 2000, precise comparison of 1990 and 2000 data on Planning Districts/Neighborhoods is not possible.

3. Racial categories of population are limited to six. Hispanic population may be included in any racial group. White alone population includes Hispanic whites. The category of persons belonging to One or More Races is termed Multiracial.

4. Numbers within parentheses at the end of the table title represent table numbers assigned by the US Census. These table numbers are useful in accessing data using American FactFinder for different types of geography such as a Census Tract or a city. A list of P (Population) and H (Housing) Tables, which provide data at the Block Group level, is given in the Appendix. **This report aggregates only Block Group level data as done for all the Planning Districts. However, data available only for Census Tracts can be aggregated to Boston city to generate a more extensive set of characteristics. Complete census tract data can be found on the US Census website.**

5. While variables are retained in their original form, some of their class intervals have been aggregated into fewer intervals to make the tables simpler.

6. Some tables include additional derived data such as medians or per capita incomes.

7. For definition of terms, please see "Census 2000 Glossary", which is published as a separate document (Report # 568) by the BRA .

8. Income-related data such as household income, poverty rates, etc. refer to year 1999.
