Census Tracts in Boston's Neighborhoods .....	5
2000 Census Tract Data.....	6

## Introduction

This report presents the listing of selected variables for the **157 census tracts** comprising the city of Boston. These data are obtained from the U.S. Census Bureau's initial release in March of 2001 of PL 94-171 data for the year 2000.

The 40 variables selected for this report are those most applicable to redistricting and most frequently requested from the PL 94-171 data. They are grouped as follows:

- **RACE** - Population Table 1 (PL1): 9 variables
- **HISPANIC or LATINO, and RACE for Population not HISPANIC or LATINO** - Population Table 2 (PL2): 11 variables
- **RACE for the POPULATION 18 YEARS and OVER** - Population Table 3 (PL3): 9 variables
- **HISPANIC or LATINO, and not HISPANIC or LATINO and RACE for the POPULATION 18 YEARS and OVER** - Population Table 4 (PL4): 11 variables

**Selected Census 2000 Variable Names**, on the next page, is a listing of the variables used in this report including the variable labels assigned by the US Census and the names of the variables under each grouping.

**Boston Census Tracts 2000 vs. 1990**, on page 3, lists the census tract numbers used in 2000 and 1990. To equalize counts for the 2000 census, the U.S. Census made some major census tract changes in Boston. Under-populated tracts were combined, and larger ones split. These changes reduce the ability to directly compare population changes in census tracts from 1990 to 2000.

**1990 vs. 2000 Census Tracts Map**, the map on page 4, displays these boundary shifts, showing 1990 tracts in black outline, 2000 tracts in red. The tracts colored in blue are the 120 that remain essentially unchanged. In summary:

- Combined: 10 census tracts in 2000 combined from 21 tracts in 1990.
- Split: 10 census tracts in 2000 split from 5 tracts in 1990.
- Major difference: 6 census tracts in 2000 with different borders from tracts in 1990 resulting in probable count differences.
- Minor difference: 11 census tracts in 2000 with minor border differences from tracts in 1990 with no likely count differences.
- Same: 120 census tracts in 2000 remain unchanged from 1990 tracts.

Finally, **Tracts Assigned to Neighborhoods**, on page 5, is a listing of the census tracts associated with specific Boston neighborhoods. It should be noted that many census tracts straddle two or more neighborhoods and these are identified by principal and secondary neighborhood. (The reader interested in correctly aligning 1990 and 2000 population counts by neighborhood must aggregate data from the block level. This analysis has been completed, however, and is available in BRA Reports #541, #542, and #543.)

**Selected Census 2000 Variable Names (from Data Dictionary)**

<b>Population Table 1 (PL1) RACE</b>

**157 Census Tracts in 2000 (CT00) vs. 171 in 1990 (CT90)**

<b>Combi:</b>	10 CT00's combined from 21 CT90's
<b>Split:</b>	10 CT00's split from 21 CT90's
<b>Diff:</b>	6 CT00's w/ different borders from CT90, possible count diff.
<b>mDiff:</b>	11 CT00's w/ minor border differences, no likely count diff.
<b>Same:</b>	120 CT00's remain the same, unchanged from CT90
<b>p071000+071100:</b>	means part of CT90 071000 combined with all of CT90 071100

## 1990 vs. 2000 Census Tracts

157 CT00's (red) vs. 171 CT90's (black):

10 CT00's combined from 21 CT90's

10 CT00's split from 5 CT90's, w/ minor diffs.

17 CT00's with minor changes (don't affect pop'n)

120 CT00's unchanged

Note: This map reads best when printed on 11x17 paper
