About the American Community Survey

The American Community Survey (ACS) is an annual survey conducted by the U.S. Census Bureau. The ACS asks a host of demographic, economic, and housing related questions that were historically associated with the now discontinued long-form of the Census.

The ACS is a sample of the total population. As a result, the data are subject to sampling error. All counts displayed in the ACS are **estimates** with a plus/minus factor for all counts and percentages. Additionally, because of the small sample sizes of the ACS, it is not possible to estimate characteristics for small geographies with the one-year data collections. In order to look at small areas within a city, such as neighborhoods, data users need to use the 5-year ACS estimates. It is important to note that the 2007-2011 ACS data are not Census counts, but rather estimates of population characteristics. As a result, counts estimated in this report will not match those corresponding population counts observed in the 2010 Census.

Please note that subcategory percentages in this report reflect the percentage within the category it is associated with and not the percentage within the total. Major categories are typically highlighted in purple in this report. Subcategories are distinguished by indented text. A glossary of select terms is included at the end of this report.

All analyses in this report were done by the BRA Research Division. The proper sourcing of this material is: *2007-2011 American Community Survey, BRA Research Division Analysis.*

Due to data reporting limitation, it is not possible to separate the Hispanic or Latino population from any racial group except for white. As a result, the aggregate number of all races in the table will exceed the total number of households.

Glossary

Family

A group of two or more people who reside together and who are related by birth, marriage, or adoption.

Gross Rent

The amount of the contract rent plus the estimated average monthly cost of utilities (electricity, gas, and water and sewer) and fuels (oil, coal, kerosene, wood, etc.) if these are paid for by the renter (or paid for the renter by someone else). Gross rent is intended to eliminate differentials that result from varying practices with respect to the inclusion of utilities and fuels as part of the rental payment.

Household

A household includes all the people, related or otherwise, who occupy a housing unit as their usual place of residence.

Linguistic Isolation

A household that is linguistically isolated is one in which no one 14 years of age and over speaks English very well.

Related Children

Includes all people in a household under the age of 18, regardless of marital status, who are related to the householder. Does not include householder's spouse or foster children, regardless of age.

SNAP

The Supplemental Nutrition Assistance Program (SNAP), formerly known as the Food Stamps program, provides eligible households with coupons that can be used to purchase food. It is administered by the Food and Nutrition Service (FNS) of the U.S. Department of Agriculture (USDA) through state and local welfare offices. SNAP is the major national income support program for which all low-income and low-resource households, regardless of household characteristics, are eligible. In general, households must meet certain tests, including resources and income tests, to be eligible for SNAP benefits. For example, through September 2013, a household of four earning up to a net monthly income of \$1,921 would be eligible for a maximum monthly allotment of \$668.
