

VISUALIZING THE FUTRE OF BEACON PARK YARD

We asked....

On August 26-28 the project team walked areas around Allston-Brighton and the Charles River with community members who said....

Creating community spaces that connect to nature

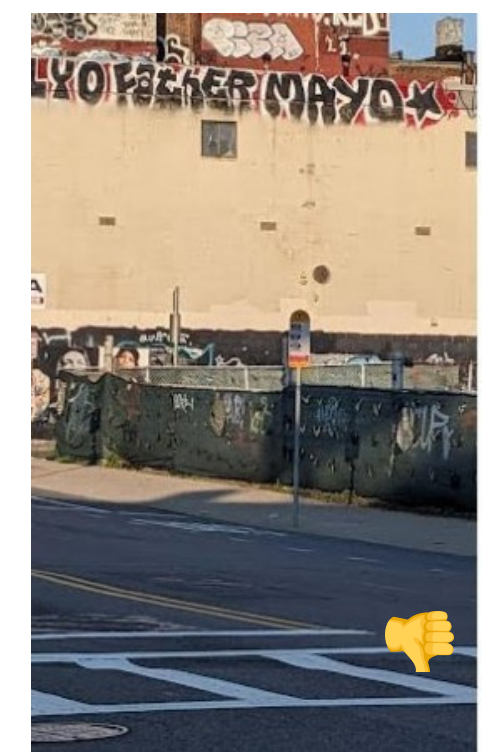

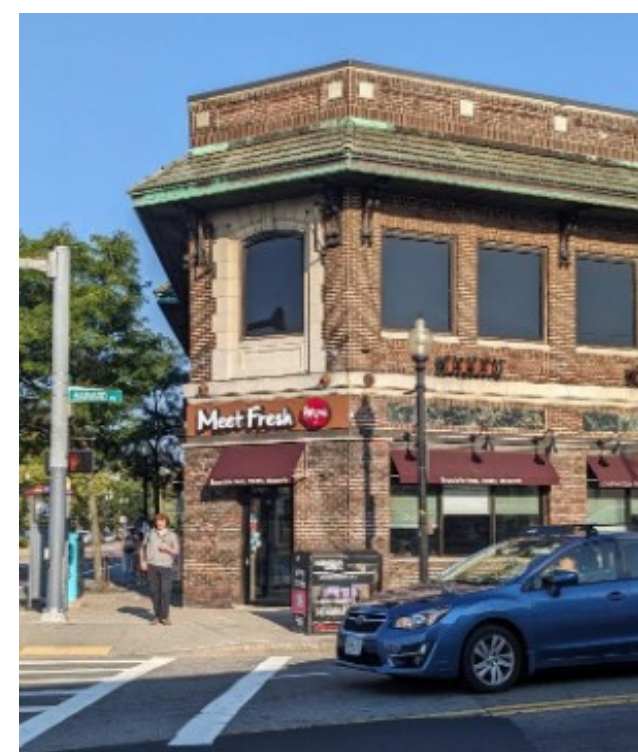

"Dance and exercise classes are fun!"

"I love green infrastructure, and hope to see lots of this, minus the fencing, at BPY."

Prioritizing mixed use development & respecting neighborhood context

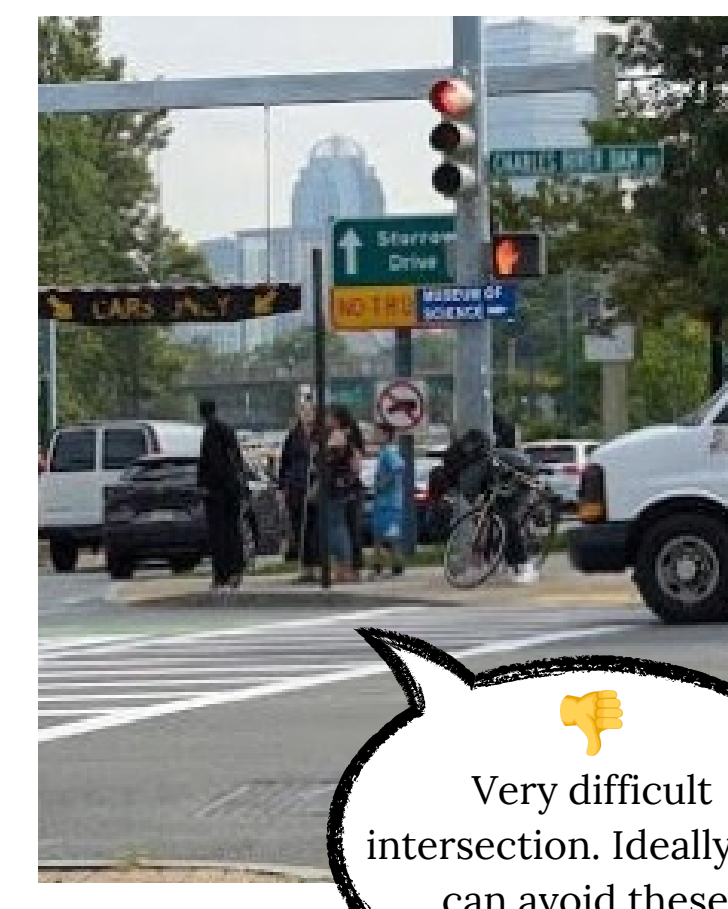

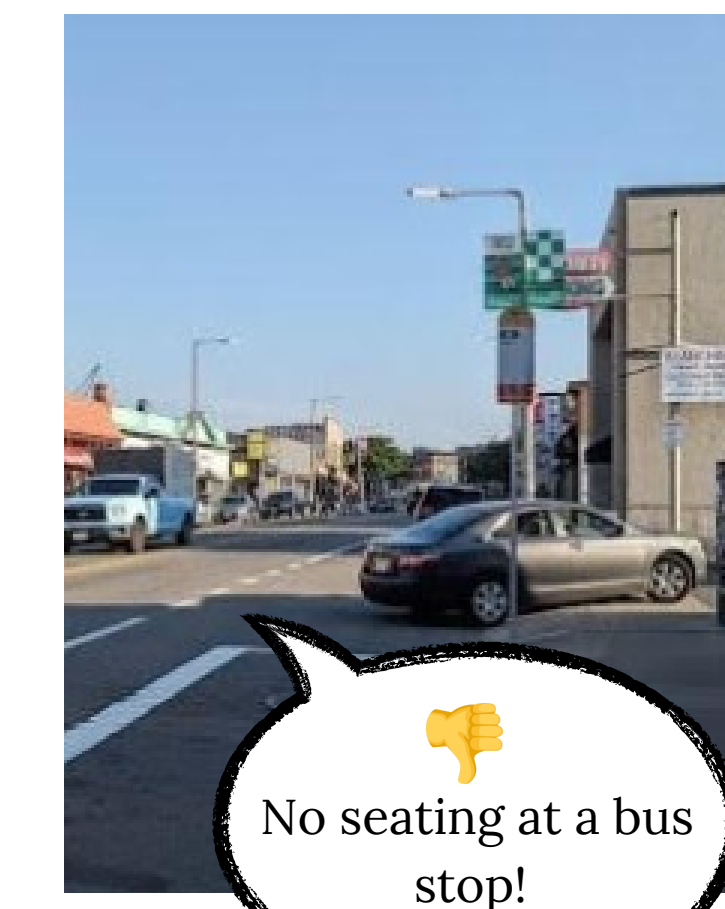

"I like the design of the bridge especially the areas that open up to provide a view of the river. (More than just a pedestrian bridge)"

"I like the tall buildings behind abundant green space. Hope this could be housing"

"Positive: long-standing local businesses."

I love Allston Village but our commercial corridors house so many more people..."

Safe areas for multi-modal transit

"Negative: no safe place to ride or park your bike."

No seating at a bus stop!

Very difficult intersection. Ideally BPY can avoid these"

"Another example of where we could have a lot more housing."
